

Struggling to find expert dental care for your loved one with special needs?

Special Smiles is 100% devoted to providing dental care for individuals whose special needs make them unable to cooperate in a traditional dental office.

One annual visit typically 100% covered by Medicaid. Your loved one will receive compassionate and comprehensive oral healthcare **under general anesthesia**. The result will be a full mouth rehabilitation, from cleaning to all treatments needed to remove decay and disease.

Your comfort is ensured by private waiting rooms and experienced staff members who each day welcome caregivers like you and their loved ones with severe intellectual, psychological, or developmental disabilities. Our goal is a safe and low-stress experience.

Schedule a consultation and dental exam at our state-of-the-art facility, conveniently located just off I-95 in Philadelphia. Parking is free. If the dentist confirms that your loved one requires general anesthesia for safe treatment, your appointment will be scheduled.
